**MunEDA Technical Forum 2008 – DAC Anaheim**

We cordially invite you to meet industrial experts on circuit design-for-yield at MunEDA Technical Forum 2008 DAC Anaheim. We are pleased to present excellent speakers & contributions for the topic:

**DFM-DFY CHALLENGES OF GLOBAL AND LOCAL STATISTICAL VARIATIONS IN INTEGRATED CIRCUIT DESIGN**

Considering the effects of process variation, mismatch and operating conditions on the performance and yield of circuits becomes more and more important for high-performance circuit designs. MunEDA software tools for analysis and optimization for circuit design-for-yield (DFY)

help circuit designers worldwide to significantly speed up their design task and to improve performance, robustness and yield of the resulting analog/mixed-signal/RF designs, as well as full-custom digital circuits and digital library elements.

MunEDA Technical Forum 2008 America will be co-located to DAC Design Automation Conference 2008

Date: Friday, June 13th 2008 (DAC-Friday)  
Location: Hilton Anaheim  
777 Convention Way  
Anaheim, California, USA
